EUROCOPTER AS350 B3E SQUIRREL

The AS350 is known for its outstanding performance and outclasses all other single engine helicopters for safety and versatility.

A popular charter choice for our clients who don't like traffic, prefer point to point travel, need rapid transit or want to arrive at an event in style.

Features:

A very reliable workhorse

Hot and heavy functional capability

Excellent maneuverability

Used for a wide range of demanding missions from aerial work, fire fighting and mountain rescue to passenger transport; approximately 90% of all private charter flights across the French Alps are using the Eurocopter AS350.

Essential Information:

-  Passengers: 5
-  Cruising speed: 127knots
-  Maximum take off weight: 2,250kg
-  Crew: 1 or 2 pilots
-  Operation: The squirrel can operate over water with floats.

Helicopter charter serves the needs of businesses and VIPs wanting access to or from London without the hassle of London's roads. We offer a fast, convenient, discreet and (most importantly) safe service for anyone wanting to get to a meeting, arrive in style at a special event or get into a remote or private site (*with the landowners permission*).

The high-performance, powerful AS350 B3 is designed to carry out the most demanding tasks in extreme weather and geographical conditions. Its exceptional lifting power, high endurance, extended range and fast cruise speed make virtually any job look easy. The AS350 B3 can climb to 3,000 meters in 2 minutes 21 seconds and has proved its power with a record breaking landing on Mount Everest.
