EUROCOPTER AS355 TWIN SQUIRREL

The twin squirrel offers the excellent handling and flexible performance features of a world class helicopter. Its twin engines allows it to safely travel over large cities, crowds and water.

Features:

- Our most economical twin for hire
- Excellent maneuverability
- Offers high speed with low vibration levels
- Proven technical track record (chosen for all the 2012 Olympic filming).

Essential Information:

Range (approximately): 350nm, 4 hours *depending on payload*

Cruising speed: 115knots

Passengers: up to 5

Maximum take off weight: 2,400kg

Reliability of two Rolls Royce engines

The twin squirrel has an outstanding track record around the world and its technical performance and reliability have made it a sought-after aircraft, capable of performing a versatile range of operations including private charter, fire fighting, search and rescue and police / air ambulance.

It is one of the most successful twin engine helicopters in the world - combining passenger comfort with speed, a 4 hour range (depending on payload).

HFS Aviation own two twin squirrels available at short notice.
